SUMMARY

Full-Stack Software Engineer with 5 years of experience building React/TypeScript web applications, backend APIs, real-time systems, and operational visibility tools. Strong background in JavaScript, TypeScript, React, Python, Node.js, WebSockets, AWS, Docker, CI/CD, dashboards, monitoring, and distributed systems. Experienced translating complex system data into reliable, user-focused tools for engineering and operations teams.

SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS, Material UI, HTML5/CSS3

Backend & APIs: Python/Flask, Node.js, Express.js, REST APIs, GraphQL, WebSockets, Microservices

Cloud/DevOps/Monitoring: AWS (ECS, EC2, S3, Lambda), Docker, Kubernetes, CodePipeline/CodeBuild, GitHub Actions, Jenkins, CloudWatch, ELK

Data & Testing: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Kafka, Elasticsearch, Jest, Cypress, Playwright, Selenium, TDD

EXPERIENCE

Software Engineer | Glider AI, Bangalore, India

June 2022 - July 2023

- Built an interactive real-time assessment platform using **TypeScript**, **WebSockets**, and **AWS ECS**, supporting 1,000+ concurrent live users with reliable live-traffic workflows.
- Designed and deployed auto-scaling microservices on **AWS ECS** with **DynamoDB** for real-time candidate and customer data, achieving 99.99% uptime.
- Built CI/CD pipelines with **CodePipeline/CodeBuild**, **Jest** TDD suites, and **CloudWatch** metrics/alarms to improve release confidence, monitoring, and incident response.

Software Developer | Datalekt (Startup), Pune, India

January 2022 - May 2022

- Architected a full-stack data processing system with **Python Flask** backend and **React** frontend, handling 10,000+ concurrent requests with fault-tolerant services and responsive UI design.
- Built reusable API and analytics components using **MongoDB**, **MySQL**, **Redis**, and **Elasticsearch**, reducing dashboard query latency from 2s to 150ms across 1M+ daily transactions.
- Developed interactive web interfaces using **JavaScript**, **HTML5**, and **CSS3**, collaborating with design teams to deliver pixel-perfect, responsive user experiences.

IT Systems Engineer | TMF Group, Pune, India

July 2018 - November 2021

- Engineered a **Java/Selenium** test automation framework that reduced regression testing cycles by 87%, cutting weekly execution time from 40 hours to 5 hours.
- Built **ELK**-based monitoring solutions for real-time performance analytics, reducing critical application outages by 60% and improving production visibility.
- Led enterprise client platform implementations and system migration schedules, customizing components to migrate 500+ production machines with zero business disruption.

PROJECTS

ATS Resume Analyzer

January 2025 - Present

- Built a full-stack AI resume analysis platform using **React**, **TypeScript**, **Node.js**, **Express**, **Prisma**, **Docker**, and **LLM APIs** to parse PDF/DOCX resumes, score job matches, identify missing keywords, and generate inline improvement suggestions.

AI & ChatGPT Trend Analysis on Reddit and 4chan

July 2024 - December 2024

- Built a **Python** analytics dashboard processing 2M+ Reddit/4chan posts with **Airflow**, **Spark**, **AWS EC2/S3**, and **Terraform** to surface AI sentiment, engagement, and platform trends.

EDUCATION

Binghamton University, SUNY | MS - Computer Science | GPA: 3.77/4.00

August 2025

Savitribai Phule Pune University | BE - Computer Engineering | GPA: 3.74/4.00

May 2018
